Dear Paul,

The Mission-Not*Impossible crew has accepted its assignment with zeal and ardor and plans an initial reconpiter before its main strike, the kind of operations once described in those memorable words, "a one-time operation - in and out!" It has assimilated your 3/6 and will be briefed further. ...

There is a seminar on politcal assassinations at a local woman's college. One of the students is interested in the Roger Craig business. In order to get the full picture for a report due soon she needs what I have mislaid or had lifted, Craig's own annotation of his testimony as printed correcting what he said were changes made without his authorization. He did this or used one prepared earlier at Maggie Fields' once where he was there with Penn. He did this or used one prepared earlier at Maggie Fields' once where he was there with Penn. If you have this, would you please send me a copy as soon as possible? Thanks.

JL leaves for Houston 3/2 for Operation Beard the Lion. He'll do o.k. I don't think it can be accomplished on a single day so I don't know when he returns. He is also stacked with deadline work. However, I will be keeping him posted if there are any developments on this and we do stay in touch. The dealine work I have in mind is legal.

I will be writing further about other things when I can. I have spent much time lately with the students in this seminar. If there are any special projects you would like to see undertaken, either now or as vacation interests or in the future I would like suggestions.

Best, HW 3/31/74
